

DOCUMENT 07

Quick Start

On your feet in five steps.

Get from zero to a complete on-set lighting plan in under 3 minutes.

Add Your Gear

1

Open My Kit add every light, modifier, and accessory you have today.

Confirm Your Space

2

In Settings enter ceiling height and room dimensions. Takes 30 seconds.

Upload a Reference

3

Tap Analyze upload a photo with the lighting you want to replicate.

Review the Result

4

Read the detected pattern, confidence score, and gear setup. Adjust as needed.

Execute in Shoot Mode

5

Tap "Start Shoot Mode" follow steps in order. Check off each as you go.

Deterministic output

PRO TIP

- Bookmark the Recipes section to study patterns before your shoot. Knowing your target pattern by name makes analysis results immediately actionable.
- Use the "Evaluate Test Shot" feature in Shoot Mode to get instant feedback on how closely your first frame matches the target.
